

Michael Herring

Full Stack Web Developer

Web developer with an unlimited aspiration to create, design, and develop technical systems and applications. Recently completed and received a certificate in full-stack development from the University of Texas at San Antonio. During my time, I developed and utilized front-end technologies such as HTML, CSS, And JavaScript. I also gained back-end skills such as Nodejs, MySQL, and Express. Committed to helping a company achieve top-tier productivity results by utilizing newly acquired front and back-end programming skills. I am ambitious and will deliver unmatched resolve to any team. I believe my value to the organization will go beyond standard expectations. With my mental tenacity and determination, my goal is to provide services and expertise that become in demand and reputable. My motivation is the opportunity to face any technological problem head-on and implement solutions.

Technical Experience

Project 1

Traveling Information App

- Built a front-end application that pulls data from Covid -19 Global Tracker API and OpenTripMap API to provide user with information.
- Used HTML, CSS, Javascript, and Bulma framework to aide in construction of application.
- Deployed to Github with further development in mind.
